

### Participant Demographic Report Form

Instructions: Enter the demographic information into the appropriate grey cells. Completing the "Total number of (unduplicated) clients" is critical, as that figure will calculate the percentages automatically. If your organization does not track a specific demographic category, then report under the "Unknown / Not Tracked" option.

The "Total number of (unduplicated) clients" that you report should represent the total number of discreet individuals to whom you provided services during the contract year. You should only count a client once, regardless of how often they used your service or how many different types of services they used. In other words, if John Smith attended seven medical appointments, he would only be counted once toward your unduplicated client count. If Jane Smith had a mental health visit and attended a support group, she would only be counted once toward your unduplicated client count.
